# Allium Quick Guide for URS Implantation
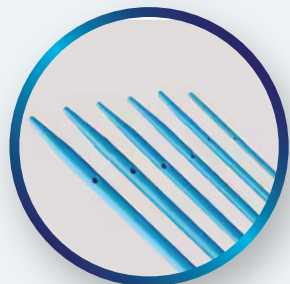

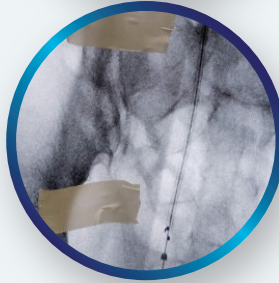

1 Measure and mark stenosis

**2** Introduce semi stiff GW D=0.035" L=1.5m minimum

3 Dilate to 14-15 FR

4 Flush DS with 5ml syringe via luer lock

**5** Introduce stent over the GW*

6 Release locking knob

7 Deploy 2-4 cm and reposition precisely if needed

3 MIN

8 Wait 3 min

9 Watch the tip on X-ray, pull back slowly

10 Verify

*DS = Delivery system, GW = Guidewire

# Allium Quick Guide for URS Removal

Allium
Urological Solutions

1 Check patient history e.g. stones

2 Introduce ureteroscope/cystoscope

3 Investigate Allium URS

Verify free edges
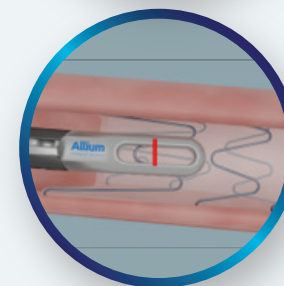

4

If calcified - lithotripsy

For distal stenosis - dilation below the stent is recommended before removal

5 Introduce Alligator grasper

6 Grasp 2 loops or entire circumference, to remove as monoblock

Grab one distal loop

Unraveling

7 Stent will be removed as monoblock or unravel
